

FINANCIAL CONDITIONS

CITY OF GULF BREEZE | FY2023

- Same low millage rate of 1.9723 mills: Overall property values increased 9% (plus 3% with new construction).
- Controlling customer costs: No proposed utility rate increase greater than 6%, despite 9.8% prior 12-month regional inflation increase. A portion of the inflation costs are absorbed by new growth rather than existing customers seeing large rate hikes.
- Economic Climate: Budget spending will decrease next year by 26% with capital projects representing 83% of the decrease.
- Same low General Fund debt while maximizing grant cost-shares: 6% of the City's general government expenses are spent on debt, primarily for stormwater improvements. This percentile is right on the Florida benchmark. (Utility enterprise debts are paid by ratepayers within the larger service area.)
